ABOUT

Software engineer focused on building **high-performance web applications**. From frontend to backend, passionate about turning complex ideas into products that work at scale. Primarily working with **React, Next.js, and Node.js**, having built everything from AI-powered developer tools to full SaaS platforms. Deeply committed to clean architecture and shipping fast without breaking things.

EXPERIENCE

Full Stack Developer

Freelance

46+ Projects Delivered

🌐 Remote • Bangladesh

- Built 46+ production-ready web applications for 20+ happy clients with 100% satisfaction rate
- Architected full-stack solutions including real-time systems, AI-powered tools, and SaaS platforms
- Implemented scalable backend infrastructure with Node.js, Express, and database optimization for high-traffic applications
- Developed responsive frontend applications using React and Next.js with modern UI frameworks and state management

React Next.js Node.js Express MongoDB PostgreSQL
TypeScript Firebase

FEATURED PROJECTS

Medi Queue

Featured Project

Full-stack education platform connecting rural classrooms

- Built comprehensive education platform connecting students and educators
- Implemented real-time communication features for interactive learning experience
- Designed scalable database architecture for managing student records and course content

React Next.js Node.js MongoDB Express REST API Vercel

Keen Keeper

Featured Project

Personal relationship management platform

- Developed relationship tracking application with intuitive UI for managing connections

SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Chakra UI, Framer Motion

Backend: Node.js, Express, REST APIs, Socket.io

Database: MongoDB, PostgreSQL, Firebase

Mobile: React Native, Expo, Electron

DevOps: Docker, Kubernetes, Git, Vercel

TECH STACK

TypeScript

React

Next.js

Node.js

Express

MongoDB

PostgreSQL

Tailwind CSS

Redux

Docker

CORE STRENGTHS

- Full-stack development
- Scalable architecture
- Real-time systems

- Implemented modern frontend architecture with React and Next.js
- Created responsive design system with Tailwind CSS

React

Next.js

JavaScript

Tailwind

Vercel

EDUCATION

Self-Taught Full Stack Developer

2020 - Present

Specialized training in modern web technologies and scalable architecture

- Mastered full-stack development with focus on React, Next.js, and Node.js ecosystems
- Built portfolio of 46+ production projects demonstrating expertise across multiple domains
- Continuously learning latest technologies including AI integration and advanced system design

- AI-powered solutions
- SaaS platforms
- Clean code practices
- Rapid prototyping
